#### **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chang (6,647,819) in view of Japanese Patent Publication No. JP-2-16678.

Regarding claim 1, Chang discloses a vehicle ceiling mounted LCD display device showing a main body housing mounted to the ceiling (Figure 1), a display housing pivotally mounted to the main body housing (20), an inherently included connecting member (such as cables or wires), and an inherently included insertion hole or holes on the display housing for receiving the connecting member. Chang does not disclose the connecting member covering member as claimed. JP-2-16678, from the similar field of endeavor, teaches such covering member (10-12). By using such covering member, the wirings connecting in between the rotating LCD monitor and the base unit are well concealed which can be very unsightly otherwise. Since the display monitor in Chang is also rotating around the base unit, the wirings would nonetheless expose when the monitor is rotated to an open position. In order to conceal the exposed wirings, it would have been obvious to one of ordinary skill in the art at the time that the invention was made to include the covering member of JP-2-16678 into Chang so that the unsightly wirings could be covered.

Application/Control Number: 10/579,833 Page 3

Art Unit: 2622

Regarding claim 2, Chang does not disclose that the insertion hole is formed by raising and cutting the display housing as claimed. In any event, JP-2-16678 shows that the cable is hooked by the edge of the housing (Figure 2) which effectively tightens the wires. Hence, it would have been obvious to one of ordinary skill in the art at the time that the invention was made to include a wire tighten means, such as taught by JP-2-16678, into Chang if the wirings ever become too slacken.

### Response to Arguments

1. Applicant's arguments filed 11/14/08 have been fully considered but they are not persuasive.

Regarding applicant's argument that Chang does not disclose or teach the electrical connecting member in between the main body and the display as claimed, the Examiner disagrees. Although not shown, Chang inherently includes an electrical connecting means in between main body 10 and display body 20 in order to provide video, power and control signals to the LCD display resided in display body 20. Without such connecting means, the display function of the LCD is simply impossible. Such connecting means is also well known and recognized and admitted by the applicant in his background of the invention. As a result, since the combination of Chang and JP-2-16678 clearly meets the claimed invention, the Office rejection stands.

#### Conclusion

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Application/Control Number: 10/579,833

Art Unit: 2622

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
